

ENVIRONMENTAL MANAGEMENT ASSOCIATION

OCTOBER 2018 NEWSLETTER

PRESIDENT'S CORNER [LARRY RUSSETTE, PRESIDENT]

Happy Fall, everyone!! First, a huge THANK YOU to all that supported and participated in this year's golf outing. Plum Hollow County Club was a great site for this year's event, and you all certainly did not disappoint. [This year we raised over \\$6,000 for our scholarship fund!!](#) We thank you to all that donated their winnings back to the association, as this is our fundraising to provide the funds for the annual scholarships. We would also like to thank all the volunteers for their dedication and work, as none of this is possible without the selfless work of many.

As we all wonder where the summer went, we find ourselves preparing for our [annual Mentoring Event for Science Fair participants on November 17th](#).

This is a great foundational event to assist students in developing and creating their Science Projects. Please read the details in this newsletter and assist us in making this a great event. Last year we had corporate sponsorships from Ford Motor and US Ecology, whose donations were spent on takeaways for the students. We are looking to expand our event this year to include more technology prizes and takeaways for students, including tablets and USB drives preloaded with resources. It is an exciting time for the EMA, and we want everyone to be a part of this momentum.

I look forward to seeing all of you at our future events!!

22ND ANNUAL EMA SCHOLARSHIP GOLF OUTING

[TRICIA WANAMAKER, EXECUTIVE DIRECTOR]

A huge THANK YOU to all who attended and supported our 22nd Annual Scholarship Sponsorship Golf Outing back in August. This golf outing has long been our primary source in funding our scholarship program, and this year we truly outdid ourselves in raising over \$6,000!! A special thanks to the many companies who sponsored this event, and to those who donated their winnings back to the EMA. Without your continued support, none of this would be possible.

USEPA/MDEQ CERTIFICATION OF XPERIENTIAL LABORATORIES

[MIKE ALBU]

Xperiential Laboratories, a division of Somnio Global LLC, recently became provisionally certified to perform inorganic chemistry testing on drinking water samples by the USEPA and the Michigan Department of Environmental Quality under Laboratory Number 9015. Such certification involves successfully analyzing unknown proficiency test samples as well as undergoing an inspection by Michigan Department of Environmental auditor. Dr. Calvin Austin is their Laboratory Director.

The laboratory has now become an official testing site to determine levels of antimony, arsenic, barium, beryllium, cadmium, chromium, lead, nickel, selenium, thallium, copper, mercury, nitrate, nitrite, and fluoride in drinking water. The majority of the metals are determined using ICP-MS instrumentation (Inductively Coupled Plasma - Mass Spectrometer) and

the remainder of the analytes are determined either by Ion Selective Electrode or manual wet methods.

Xperiential Laboratories was founded approximately three years ago and performs other analyses in addition to drinking water testing such as SEM and TEM microscopy, microbiology, raw material qualification, food testing, corrosion analysis, and bio-molecule characterization to name a few. Visit our website to see more of our offerings at www.xperiential.com or call us at 248-574-5528.

Please keep Xperiential Laboratories in mind if you require certified drinking water testing in the future. Our customer base includes private residential citizens, commercial businesses, school systems, home inspectors, and other laboratories.

The purpose of the EMA is to establish and maintain an active information exchange between government and industry professionals involved with environmental management to arrive at solutions to environmental issues within a framework of ethics appropriate to the environmental field. The EMA believes in and supports the application of integrity, common sense, sound sciences, and fiscal responsibility in all matters affecting the environment.
