Welcome to our virtual enviroCHAT discussion on:

## A New Normal: COVID-19 Decontamination & Disinfectant Protocols

We are excited to have our special guests **Karl Verity** (ERG Environmental Services), **Dan VerHaeghe** (Marine Pollution Control), and a guest speaker from US Ecology with us today in discussing COVID-19 decontamination and disinfectant protocols.

A few basic guidelines for the audience of today's discussion:

- Please keep your microphone audio on MUTE during each presentation.
- We welcome and encourage your questions and comments!! During the presentation, please type your question or comment in the CHAT.
  - To open the chat, click the CHAT icon (bottom-center of the screen).
- We will have an open discussion after all of the presentations. If you would like to ask a question, please RAISE YOUR HAND to avoid virtual congestion.
  - To raise your hand, click the PARTICIPANTS icon (bottom of the screen, near the CHAT icon) and then click RAISE HAND.

This enviroChat will be approximately 45 minutes, with time for discussion after the presentations. Each speaker will have 10-15 minutes to discuss their portion. After the event, there will be a feedback form emailed to all participants. We greatly appreciate your thoughts and opinions, as we are navigating our own "new normal" with moving to a virtual platform.
